PROFILE

Full-Stack Developer and Data Science graduate experienced in building scalable web applications and AI-powered systems using React.js, Next.js, Node.js, Python, FastAPI, Flask, MongoDB, PostgreSQL, and Docker. Skilled in REST APIs, authentication, RBAC, RAG pipelines, LLM integration, asynchronous background processing, database design, and responsive dashboards.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, SQL, R, HTML5, CSS3
Frontend: React.js, Next.js, Bootstrap, Responsive Web Development
Backend: Node.js, Express.js, FastAPI, Flask, REST APIs
Databases: MongoDB, PostgreSQL
AI/GenAI: Generative AI, NLP, RAG, Prompt Engineering, LLMs
Tools: Git, GitHub, Docker, GitHub Actions, CI/CD
Libraries: Pandas, NumPy, Scikit-learn, TensorFlow, PyTorch

PROJECTS

ReachInbox Email Scheduler

[GitHub](#)

Node.js, Express.js, TypeScript, PostgreSQL, Redis, BullMQ, Next.js

- Built a full-stack email scheduling platform with a Next.js dashboard for campaign creation, scheduling, and delivery status tracking.
- Implemented asynchronous background job processing with BullMQ and Redis, using PostgreSQL persistence for reliable scheduled email execution.
- Developed REST APIs and queue-based workflows to process scheduled emails asynchronously without blocking the main application.

AI Travel Planner

[GitHub](#)

Next.js, Node.js, MongoDB, Gemini AI

- Developed a full-stack AI travel planner generating personalized itineraries, budget estimates, hotel suggestions, and smart packing recommendations.
- Integrated Gemini AI using prompt engineering and structured JSON generation to produce consistent, application-ready itinerary responses.
- Implemented MongoDB persistence for users and trips with retry, backoff, and itinerary regeneration to improve AI workflow reliability.

AI Research & Knowledge Assistant

[GitHub](#)

Python, FastAPI, RAG, LLMs

- Built a RAG-based knowledge assistant supporting semantic, keyword, and hybrid search for context-aware question answering across multiple documents.
- Developed FastAPI retrieval and generation pipelines with citation-grounded LLM responses to improve answer traceability and research reliability.
- Implemented document classification, multi-document summarization, comparison, and conversational memory for end-to-end research workflows.

Custom Employee Portal – Zoho Integration

[GitHub](#) — [Live](#)

JavaScript, JWT, RBAC, Zoho People, CRM, Desk, Books

- Built a custom employee portal with JWT authentication, RBAC, admin management, and audit logging for secure employee workflows.
- Integrated Zoho People, CRM, Desk, and Books to connect employee and business operations across multiple Zoho services.
- Implemented role-based permissions and administrative workflows to control feature access and maintain traceable user activity.

EXPERIENCE

Data Analyst Intern – VrNexGen Technologies

Jun 2025 – Sep 2025

- Performed exploratory data analysis, data cleaning, preprocessing, and statistical analysis to identify trends, patterns, and actionable insights from datasets.
- Created analytical visualizations using Matplotlib, Seaborn, and Plotly to communicate findings and support data-driven decision-making.
- Evaluated processed datasets for data quality and consistency, supporting downstream modeling and project outcomes.

Backend Developer Intern – Geazy Technologies

Sep 2025 – Dec 2025

- Developed Flask backend features using modular routes, controllers, validations, and handlers for maintainable and structured application architecture.
- Implemented SQLAlchemy ORM models, queries, and relationships for efficient database operations and structured data management.
- Contributed to Stock List, Physical Stock Count, and Supplies modules, improving backend logic, data flow, and system reliability.

EDUCATION

Integrated M.Sc. in Data Science – Amrita Vishwa Vidyapeetham

2021–2026

Higher Secondary Education (HSC) – Shri Renuga Vidhyalayam Matric Higher Secondary School

2021

Secondary Education (SSLC) – Shri Renuga Vidhyalayam Matric Higher Secondary School

2019

CERTIFICATIONS

NxtWave: Build Your Own Static Website; Build Your Own Responsive Website; Introduction to Databases; Build Your Own Dynamic Web Application; Programming Foundation With Python.
